

Existing Conditions Maps

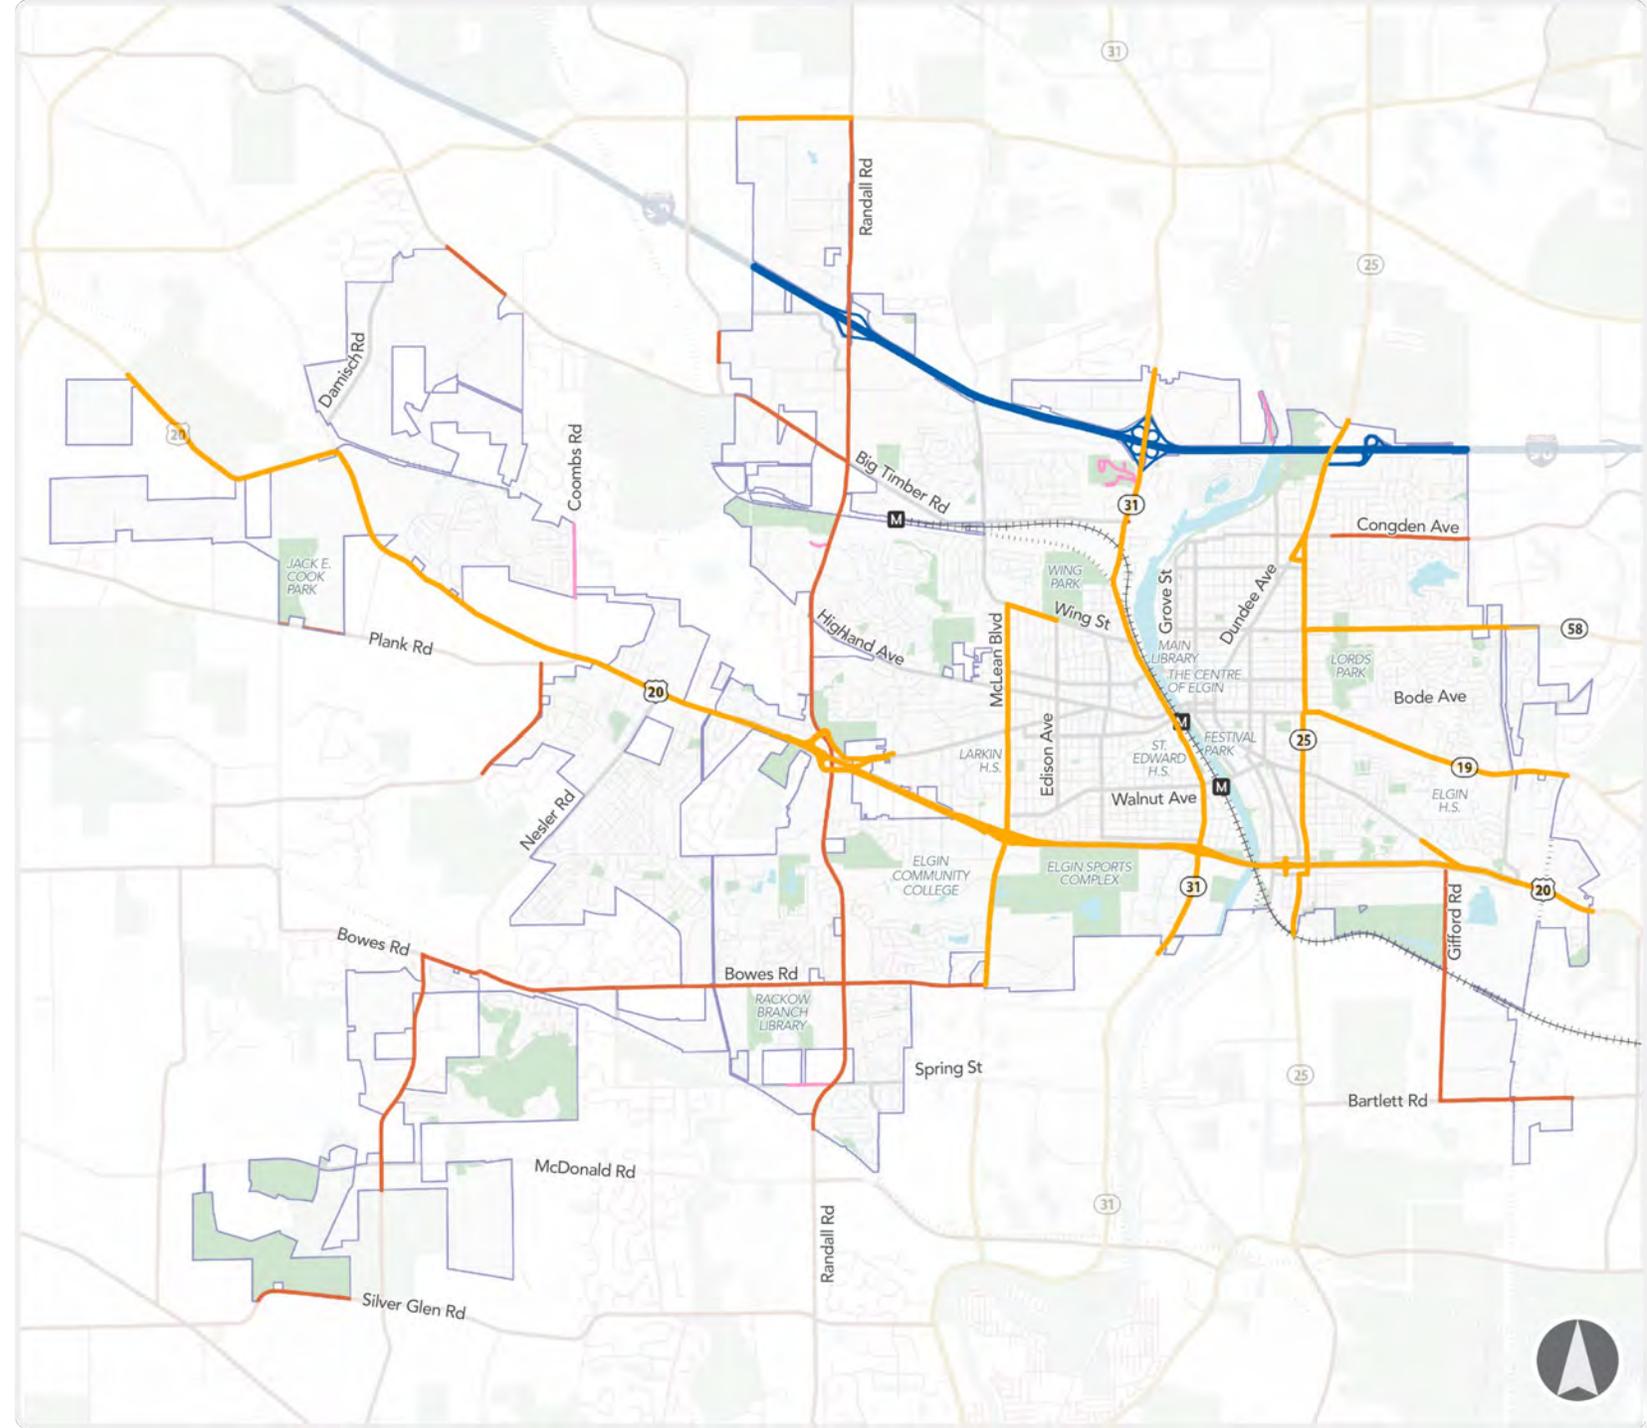

May 2025

Roadway Jurisdiction

- Many roadways under IDOT and Kane or Cook County jurisdiction
- Some roadways change jurisdiction throughout the City
- Adds coordination and complexity to potential improvements

- City Boundary
- Parks / Open Space
- ⊕ M ⊖ Metra Station / Rail Line
- ⊕ ⊖ Freight Rail Line

- Roadway Jurisdiction**
- Tollway
 - IDOT
 - County
 - Elgin
 - Township

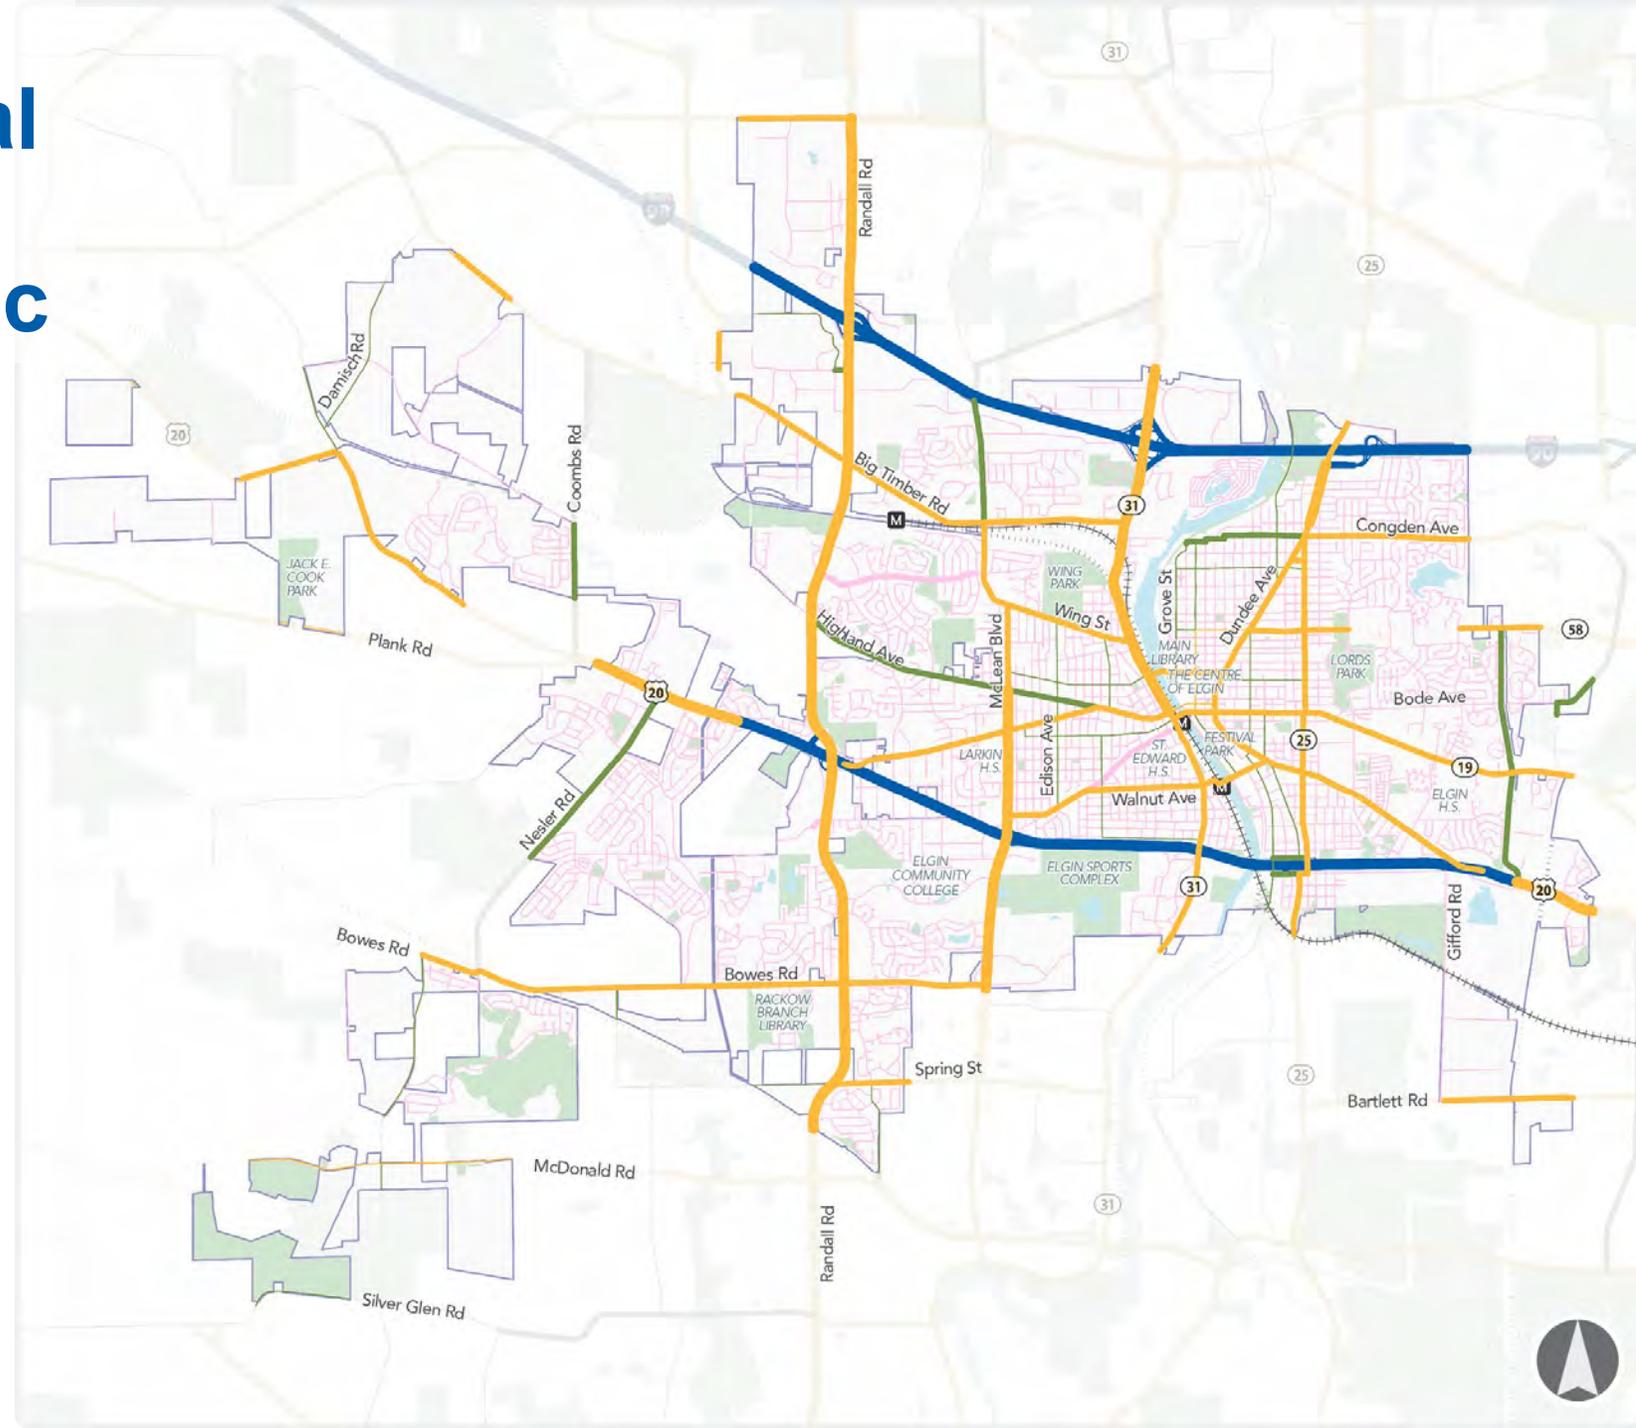

Roadway Functional Class and Annual Average Daily Traffic

- Busiest roadways include Randall, McLean, State, Dundee
- US 20 and I-90 experience a large portion of east-west traffic
- Randall and State are the busiest north-south corridors

- City Boundary
- Parks / Open Space
- ⊕ M ⊖ Metra Station / Rail Line
- ⊕ ⊖ Freight Rail Line

Annual Average Daily Traffic			
Low	Medium	High	
			Interstate
			Arterial
			Collector
			Local

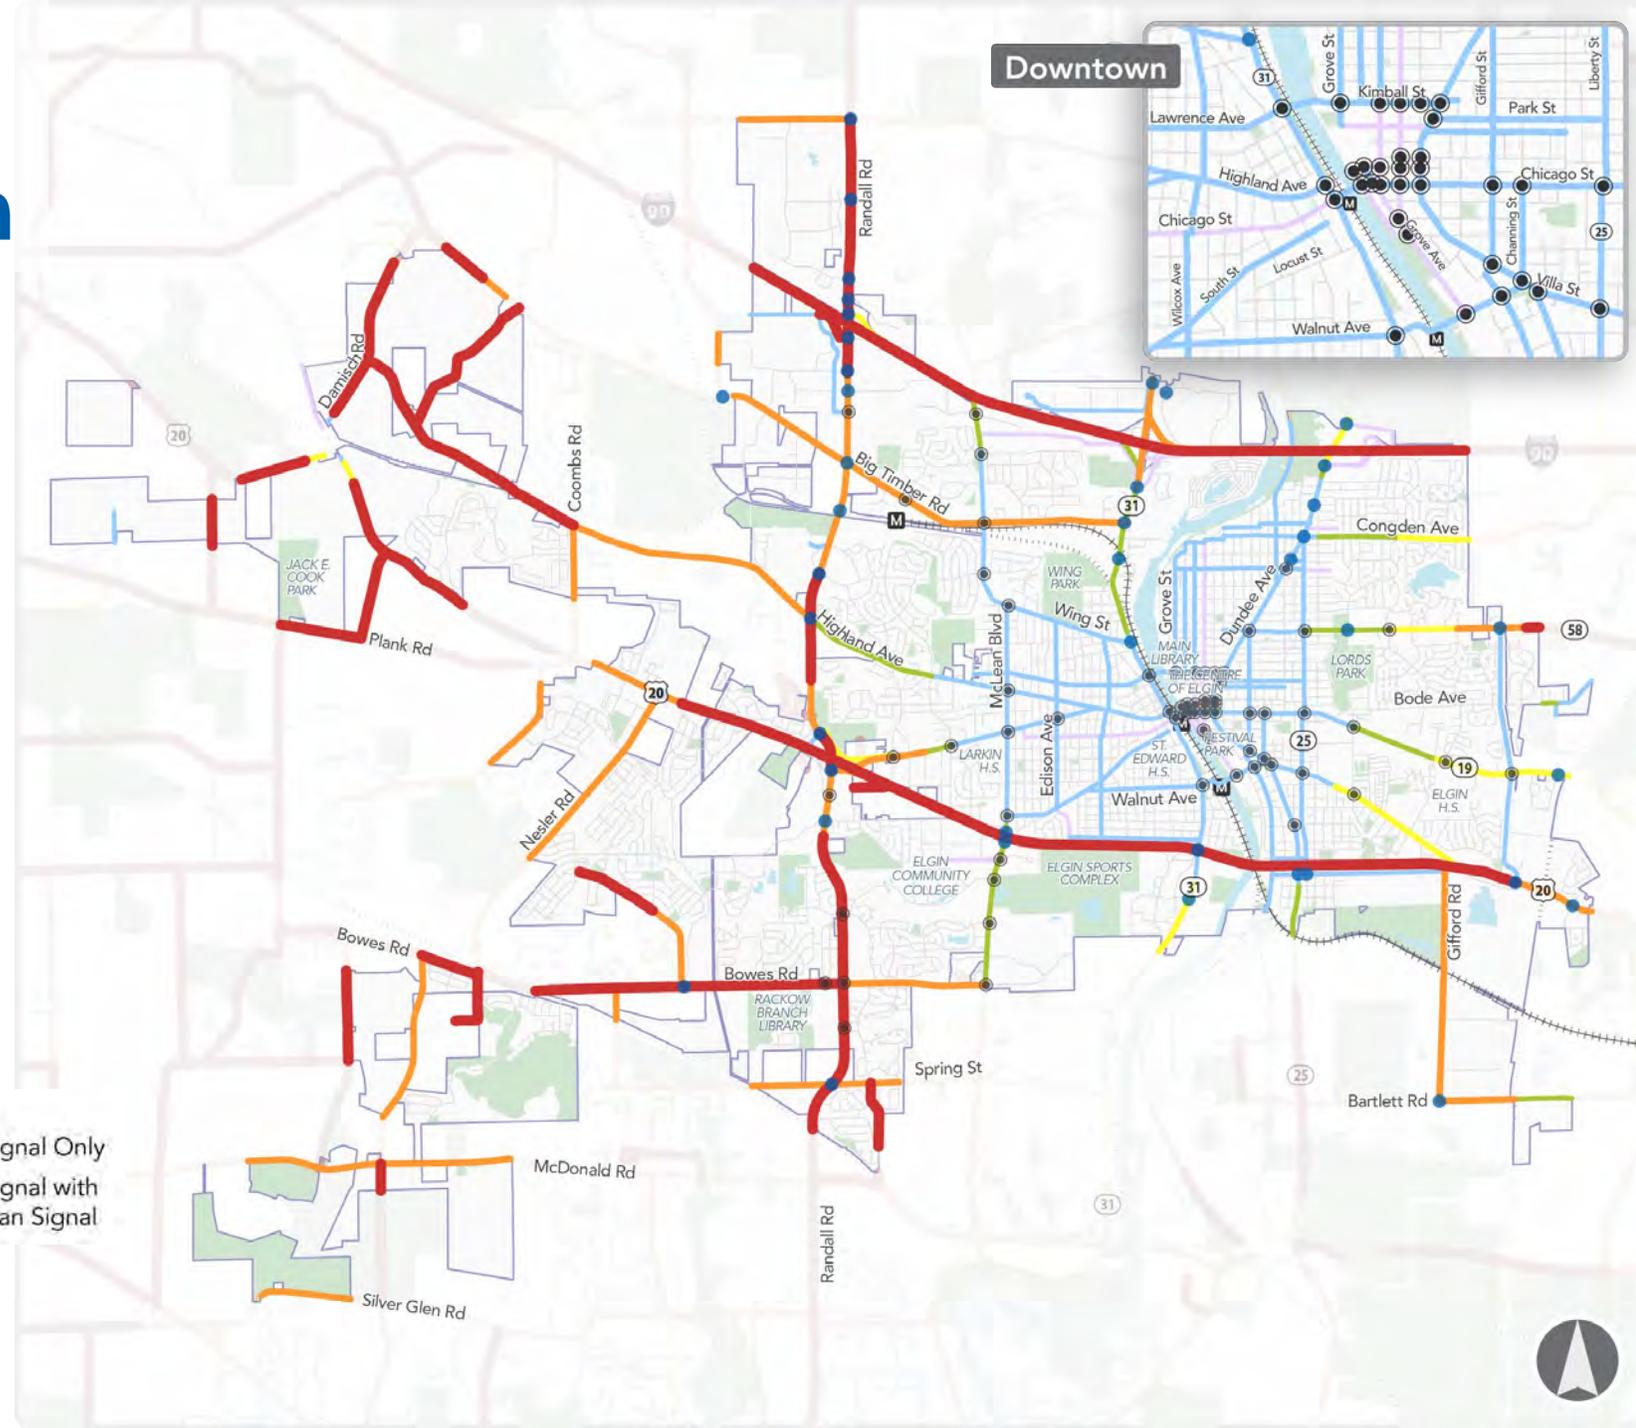

Speed Limits + Traffic Signalization

- Most arterial and collector roads are 35+ mph or more
- Streets in and near downtown typically have speed limits of 30 mph or less
- Potential crossing improvements will be explored, considering locations with and without existing pedestrian signals

- City Boundary
- Parks / Open Space
- Ⓜ Metra Station / Rail Line
- ▬ Freight Rail Line

- Speed Limit**
- 50 or more
 - 45
 - 40
 - 35
 - 30
 - 25
 - 20 or below

- Traffic Signals**
- Traffic Signal Only
 - ⊙ Traffic Signal with Pedestrian Signal

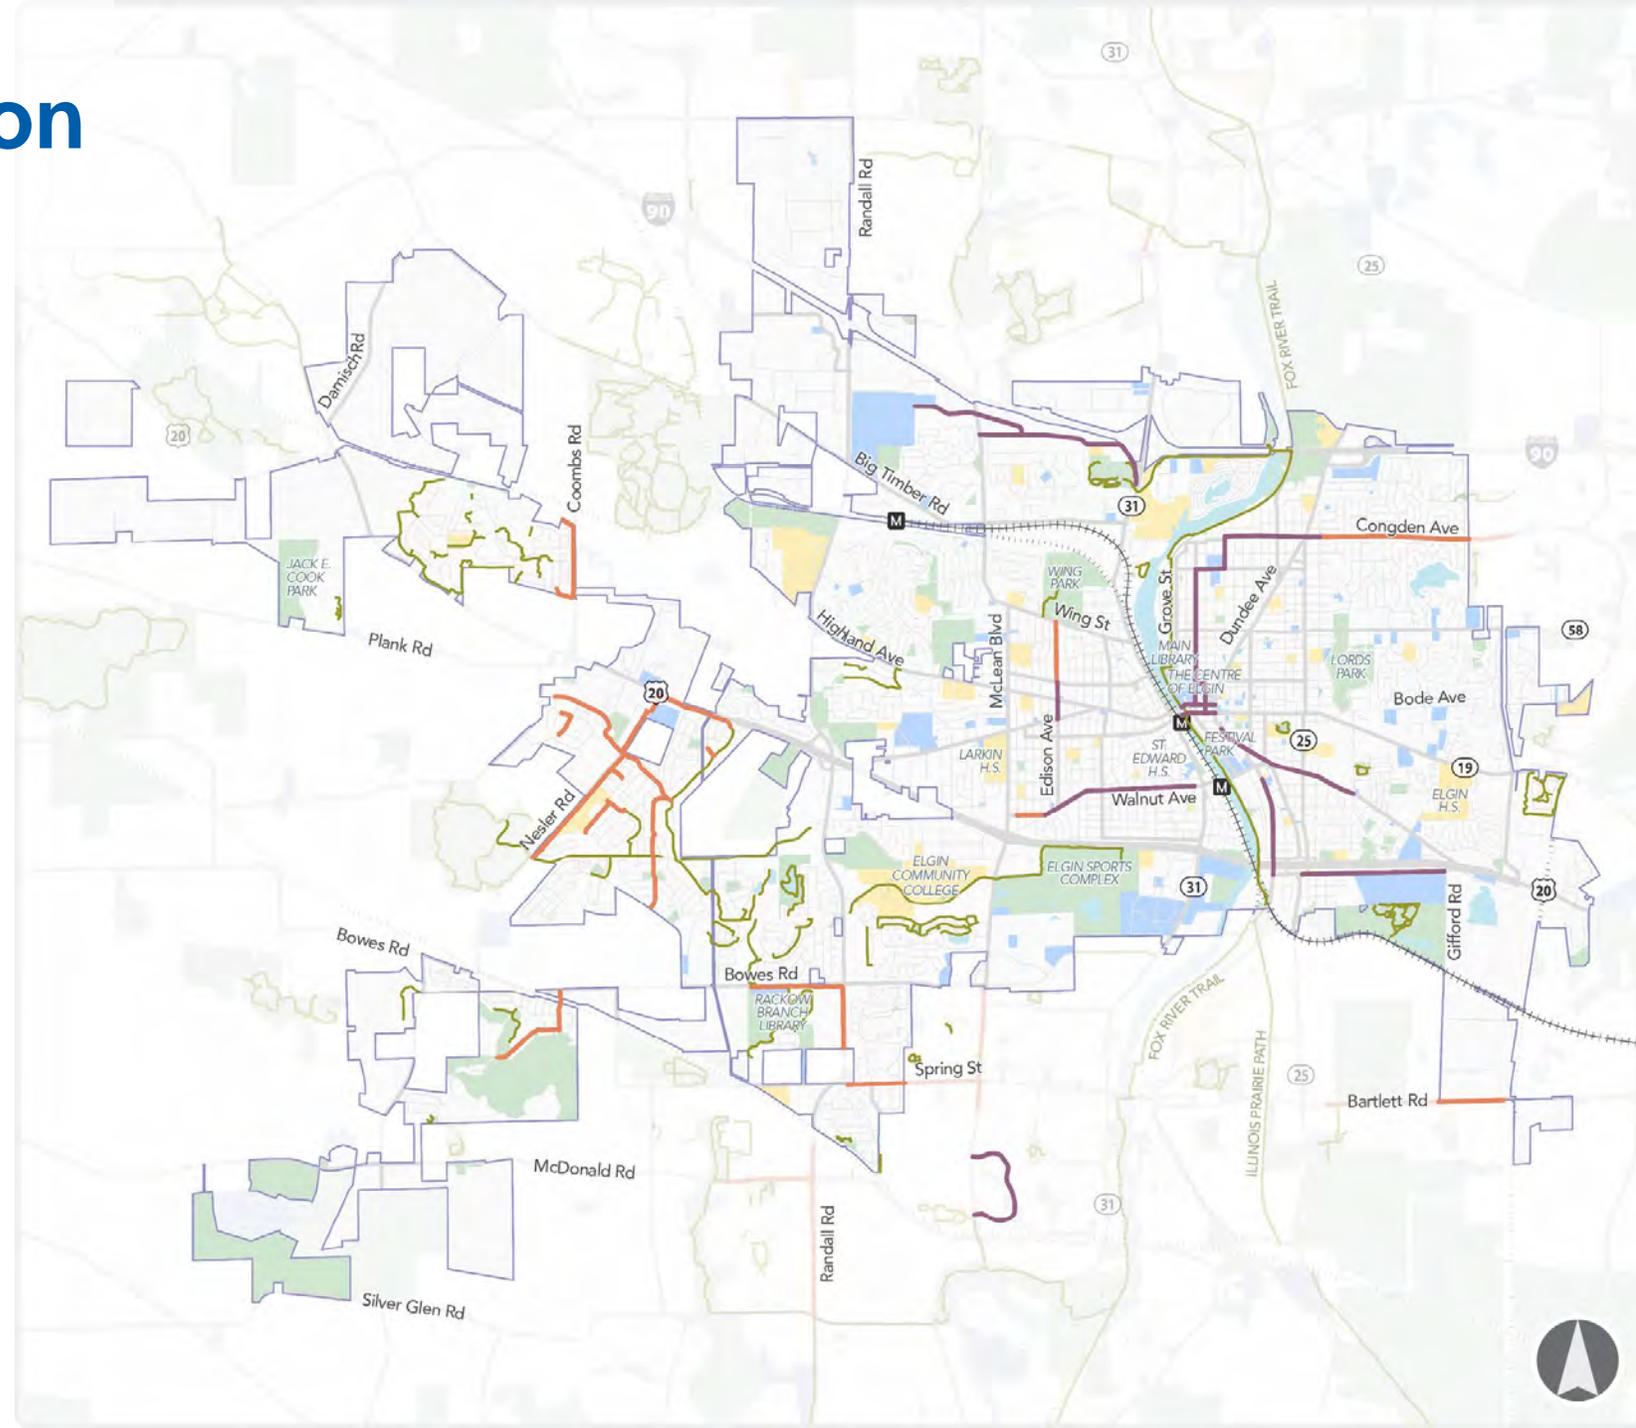

Active Transportation Network (Existing)

- Gaps between bike facilities
- No complete north-south or east-west connection
- Most existing facilities are on-street
- Shared-use paths and trails prevalent in new residential development areas

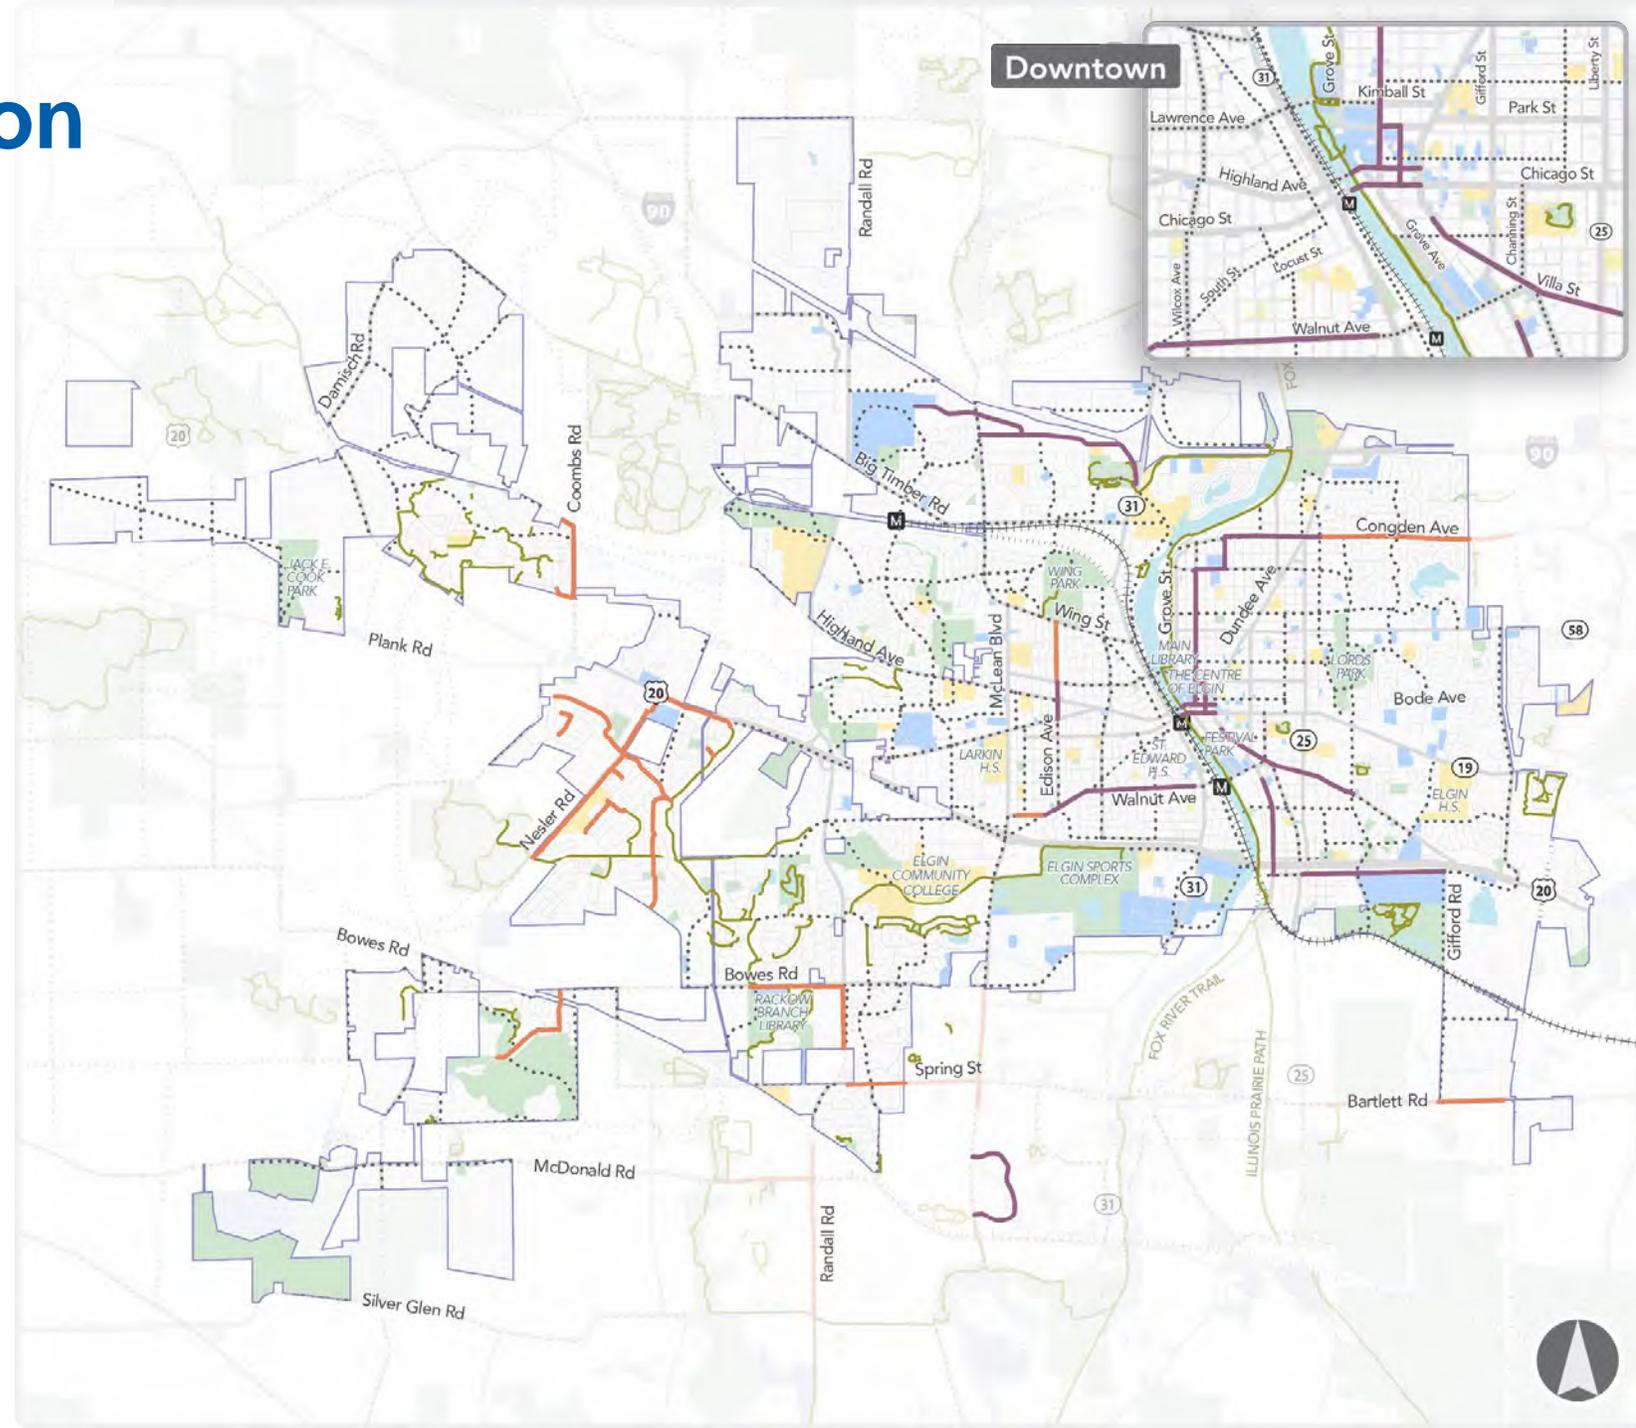

- City Boundary
- Parks / Open Space
- Metra Station / Rail Line
- Freight Rail Line
- School
- Community-Oriented Space

- Bike Facilities**
- On-Street
 - Shared-Use Path
 - Trail

Active Transportation Network (Future)

- Future facilities as envisioned in 2008 Bikeway Master Plan
- Fills gaps between existing facilities
- Network recommendations will consider facilities that have been built and current conditions

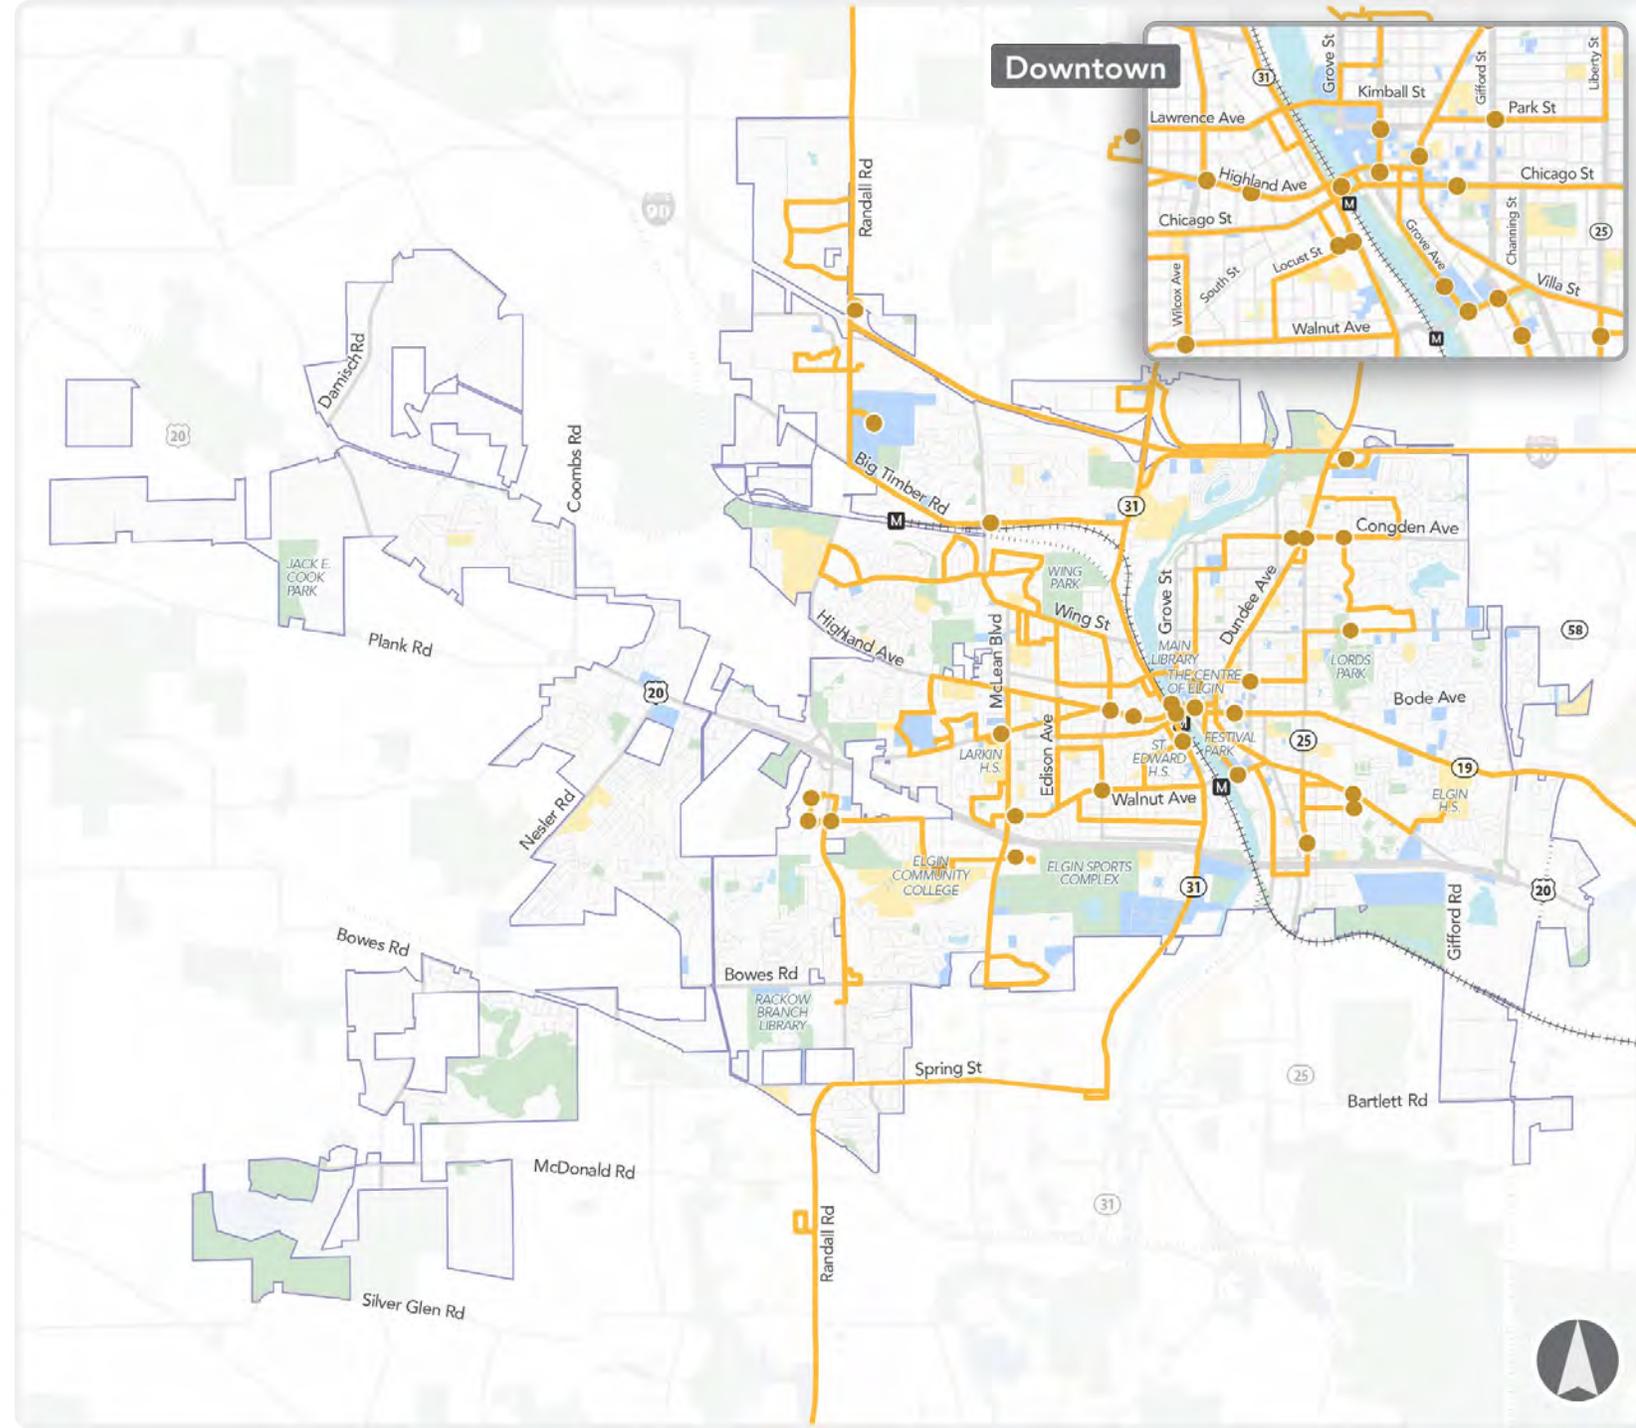

Transit Network

- Pace bus routes serving local and regional destinations
- Highest ridership Pace stops:
 - › Elgin Transportation Center
 - › Randall Road Park-n-Ride
 - › Lyle Ave and Grandstand Pl
- Elgin Transportation Center an important asset
- Potential for improved connectivity to transit facilities, and between Metra stations and key destinations

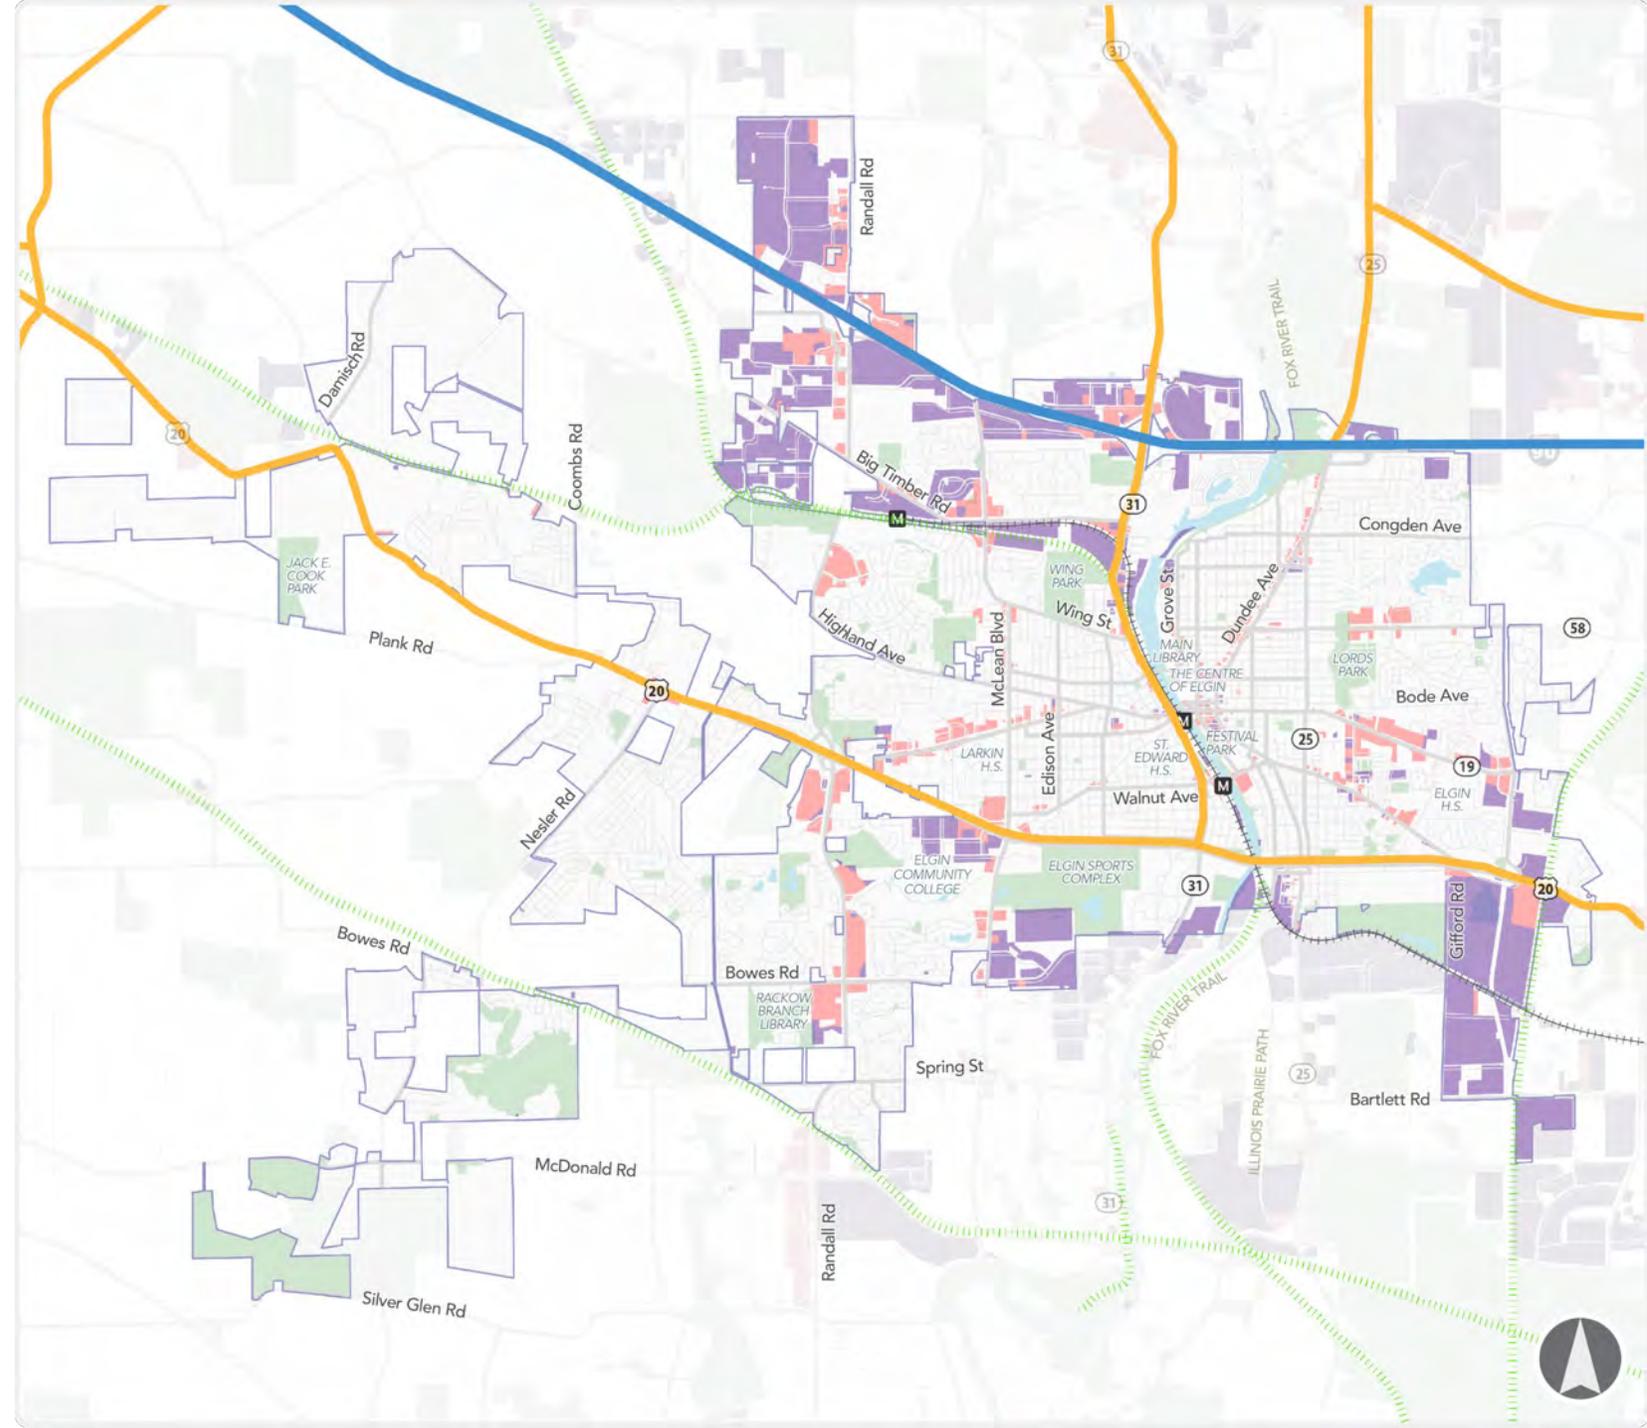

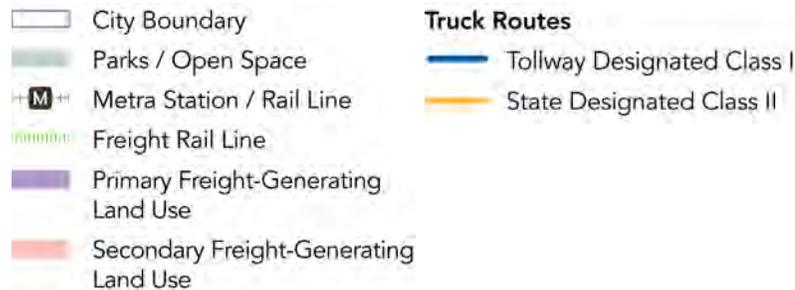

- City Boundary
- Parks / Open Space
- Metra Station / Rail Line
- Freight Rail Line
- School
- Community-Oriented Space

- Pace Bus**
- High Ridership Bus Stop
- Bus Route
- * The entire city is served by Pace On-Demand

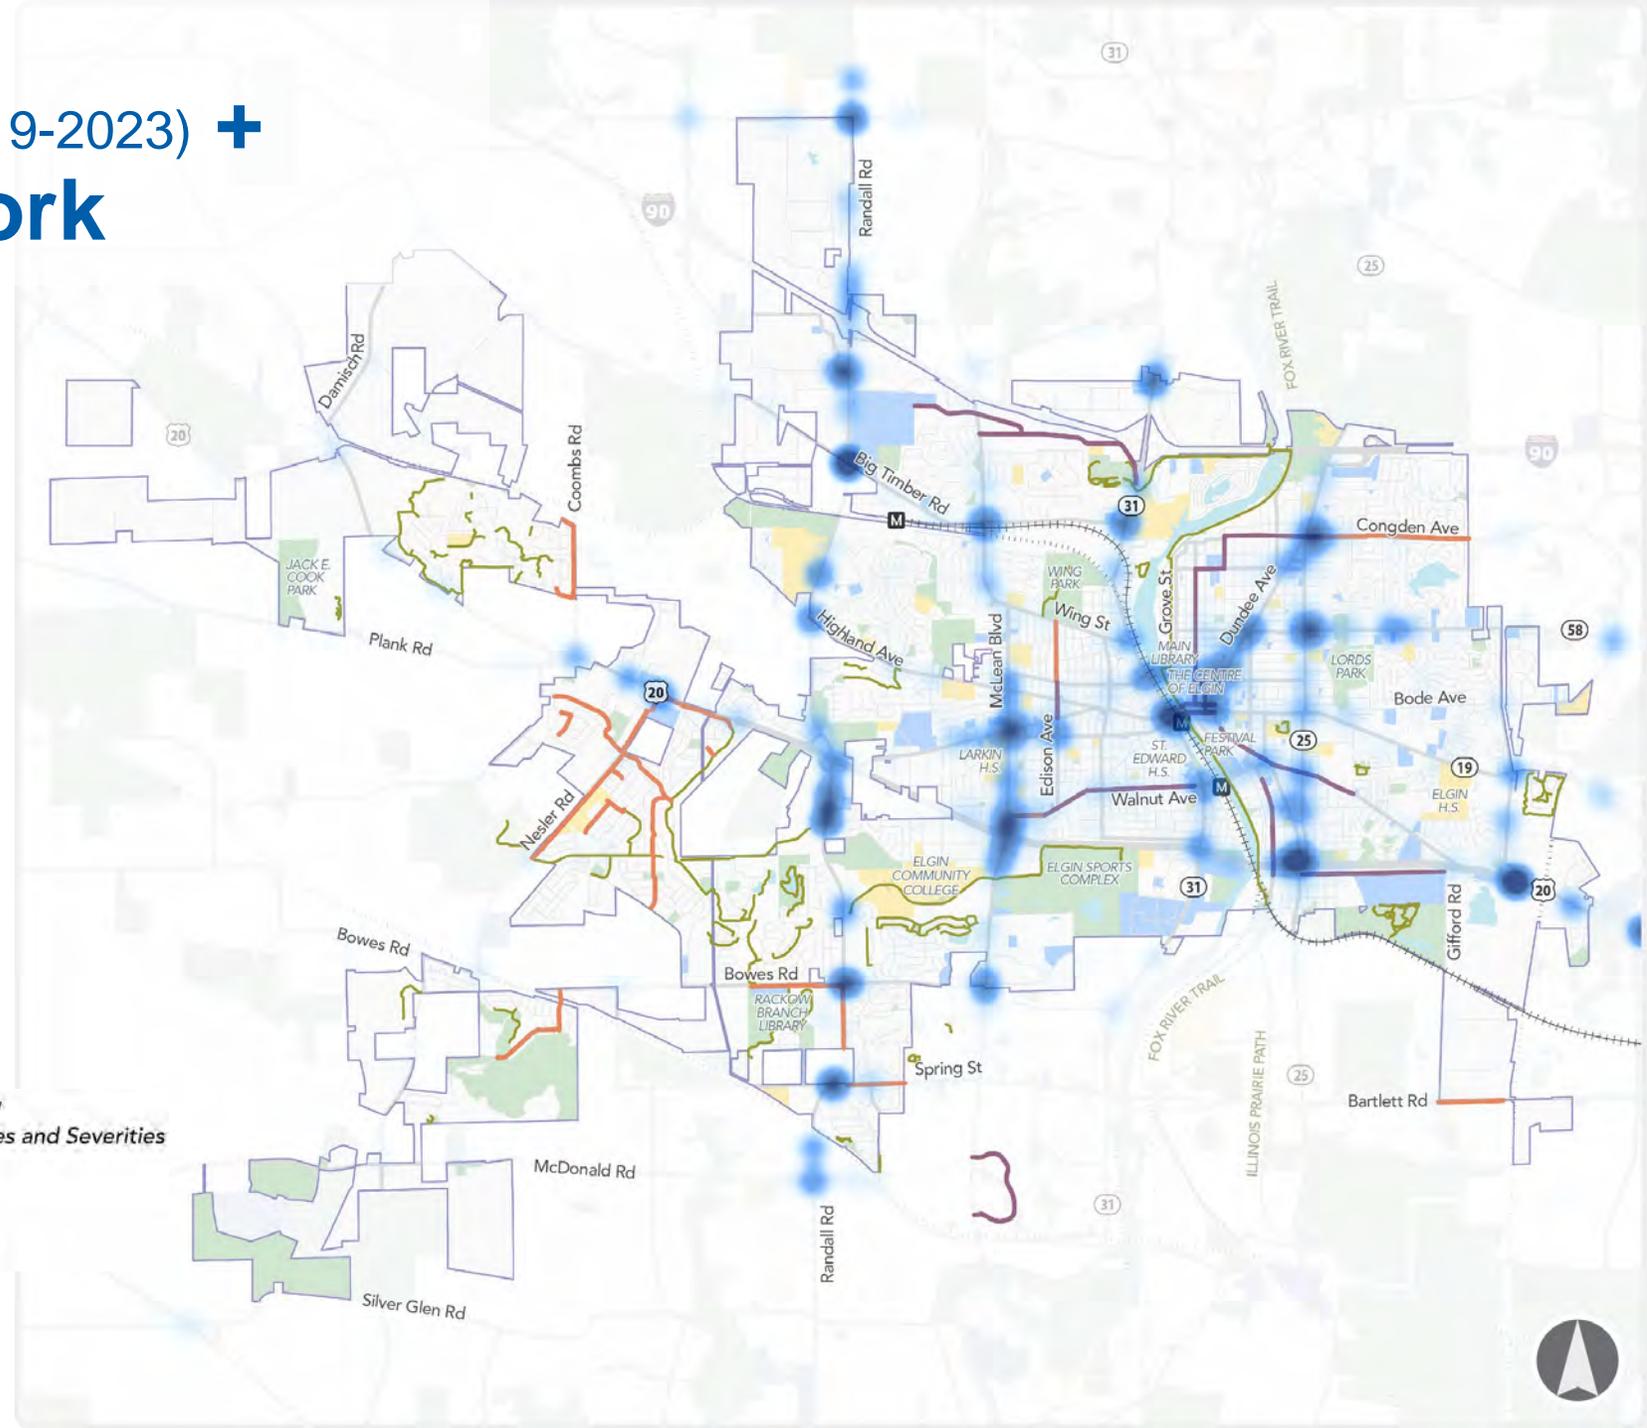

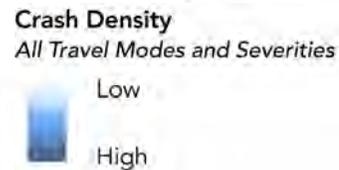

Truck Routes + Freight Generating Land Uses

- Freight-generating land uses in northwest and southeast area of City
- Truck routes relatively confined to few roadways
- Truck routes taken into consideration for safety of those walking, biking and rolling

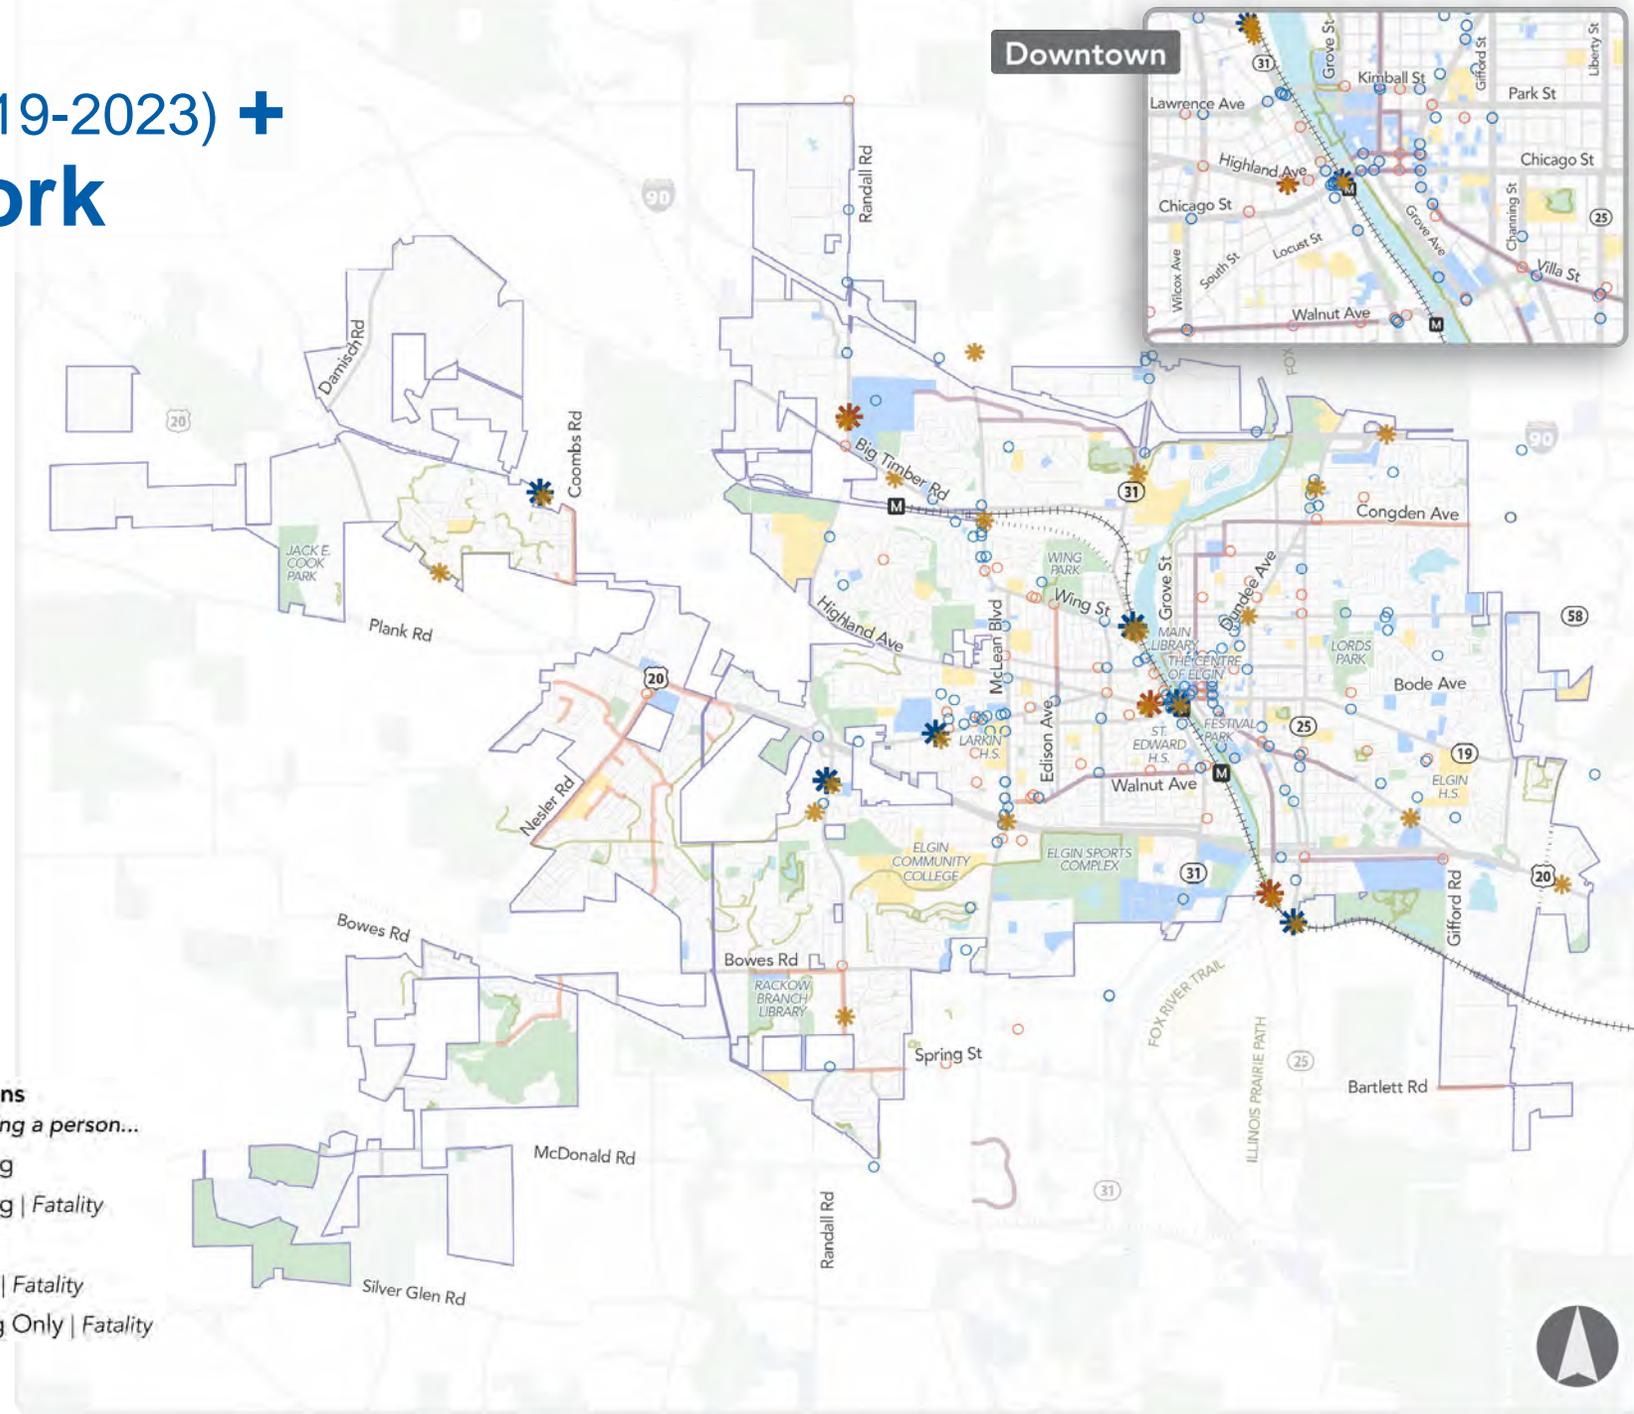

Crash Hot Spots (2019-2023) + Existing Bike Network

- Most crash hot spots are located at major intersections
- Hot spots along Randall, McLean, Dundee, State, at intersections along US 20

Crash Locations (2019-2023) + Existing Bike Network

- Focus on crashes involving a person walking or biking
- Crash locations throughout the City, though there are cluster areas of injuries and fatalities:
 - › Chicago St and State St
 - › Dundee Ave and Congdon Ave
 - › McLean Blvd and Larkin Ave
 - › McLean Blvd and Big Timber
 - › McLean Blvd and US 20
- Safety improvements will be at base of all recommendations

Active Transportation Propensity Index

- Index comprised of:
 - › Generators - areas where people are more likely to bike or walk
 - › Attractors – Roadways that lead to commonly-visited places
- Downtown, and portions of near west and south sides are the highest rated areas
- Overlapping areas between attractors and generators are good candidates for bicycle and pedestrian facilities
